Model 53-P

BIA and Coast Guard Requirements

Tested to meet or exceed A-16 standard, Waterproof Fulton Marine Running Lights meet all lawful requirements for use on inland and international waters. Bowlites & sternlites use Fulton #1 Krypton bulb, which provides 70% brighter light than standard bulbs. Not only do Fulton Marine Lights offer the convenience of battery operation, but also are quickly and easily affixed and removed to prevent theft. Made in the USA.

ABS plastic body with waterproof seals. Easy-to-operate push button switches with complete placement instructions included in each package.

Must use Fulton #1 bulb to meet requirements. 6 per case.

Identical to No. 48 with camouflage body.

Order #48C-PWR-CL

Running Lights for Inflatables

Comes in Skin Packaging

Fulton Removable Marine Running Lights for inflatables offer the convenience of battery operation, while making the utilization of the growing fleet of inflatable boats possible.

A flexible urethane mount is glued to the bow and stern. The running lights are easily and quickly affixed to the mount and held in place with a cotter key. This also for easy removal to avoid theft and deflate and store boat.

Model 55-P Bowlite

Red/green lens (Patent Pending).
2 1/2" diameter. 7 1/2" long.
Approximately 3" in height.
Uses 2 D cells.

Model 55-P
